

CAT5Works is a proven CAD interoperability solution that is robust, reliable, easy-to-use, and enables engineering collaboration between CATIA V4/V5 and SOLIDWORKS

A Bi-Directional SOLIDWORKS/CATIA Data Translator

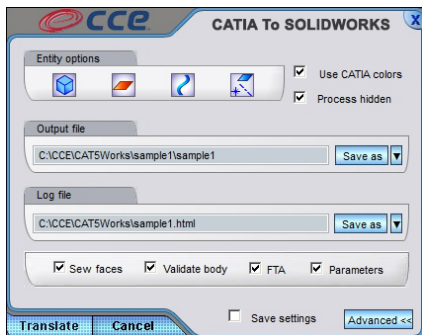

- ➡ **Plug-and-Play Solution**
- ➡ **Fast Translations**
- ➡ **Read and Write 3D Data**

- Same “look and feel” as other SOLIDWORKS plug-ins

- Direct data translation between CATIA V4/V5 and SOLIDWORKS without any intermediate or neutral data format

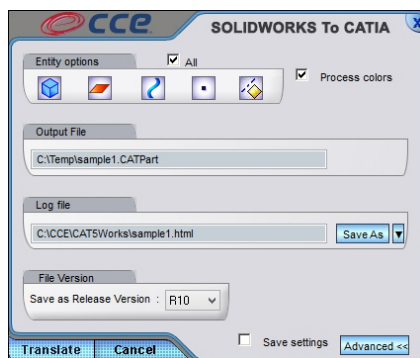

- Minimum loss of source data and faster translation
- Does NOT require CATIA V4/V5 license
- Available with subscription-based license (requires internet connection)

- Translation of CATIA V5 colors into SOLIDWORKS

- Transfer of CATIA V5 FT&A entities (Flag note, Text, Geometric Tolerance, Simple Datum, Datum Target, and Roughness) into SOLIDWORKS

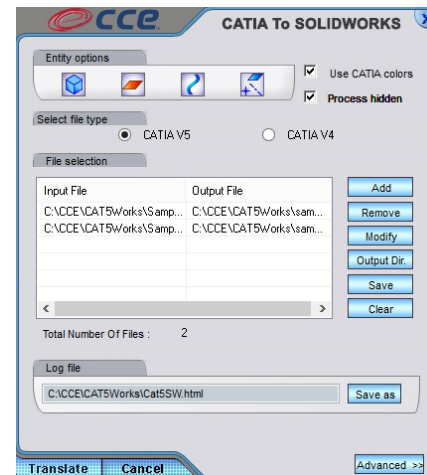

- CATIA V4 Export, Model, and Session files supported for translation into SOLIDWORKS

- Import data from CATIA V5 Release 6 up to V5-6R2017 (R27) part (*.CATPart)/ assembly (*.CATProduct) files to SOLIDWORKS and export SOLIDWORKS files to CATIA V5 part (*.CATPart)/assembly (*.CATProduct) files to SOLIDWORKS

- CATIA data can be filtered by Entities and Layers for conversion into SOLIDWORKS
- Export SOLIDWORKS assemblies based on the Component Configurations

- Batch translation for convenient handling of bulk data

- Options to sew and validate sewn bodies before importing to SOLIDWORKS
- Compatibility with SOLIDWORKS 2015/2016/2017. Also compatible with Windows OS (Win 7/8/8.1/10) 64-bit
