

Data Translation from Unigraphics to Mastercam has never been simpler...

MC/Ug is a direct CAD Interoperability solution that is robust, reliable, easy to use and optimizes the engineering design needs between Unigraphics and Mastercam.

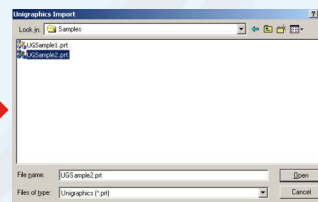

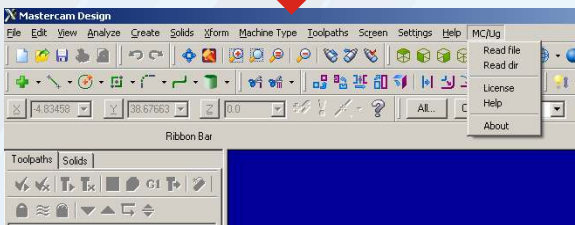

1. Load Mastercam, press Alt+C to load C-Hooks MC/Ug

Unigraphics To Mastercam

Begin working with Mastercam part

2. Click 'Read file' from menu and select input Unigraphics part

3. Click 'Options' from menu, specify translation options and hit 'OK' to translate

- C-Hook integrated within the Mastercam environment and has the same "look and feel" as other Mastercam plug-ins.
- Direct data translation between Unigraphics and Mastercam without any intermediate or neutral data format. Minimum loss of legacy data and faster translation.
- Does NOT require Unigraphics License.
- Unigraphics Version 13.0 to NX7 part and assembly files are supported for translation to Mastercam X MR1 to X4 MU2 files.
- Translates GD&T data in Unigraphics (NX till NX7) to Mastercam
- Intuitive User Interface.
- Supports translation of Unigraphics colors, layers and layer categories into Mastercam.
- Supports translation of each Unigraphics component to separate Mastercam levels.
- Supports import of Unigraphics file into currently opened Mastercam document.
- Batch Translation for convenient handling of bulk data.
- Translation options can be saved and retrieved for subsequent translations with same options.
- Product is available in English and Japanese languages.
- Report files in HTML and Text format.
- Runs on Windows XP, Windows Vista and Windows 7 platforms.
- Comes with Desktop and web-centric subscription based license mechanism
- Compatible with Mastercam installed in x64 platform
