

PowerLink

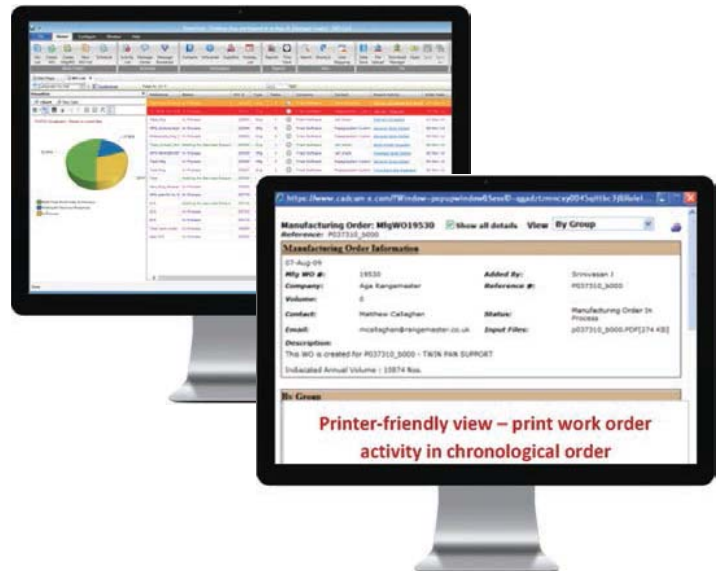

Work Order Management System

PowerLink Technology

PowerLink is a proprietary, web-based tool that is designed for communication and management of your offshore engineering outsourcing program. Using PowerLink, you can securely initiate, organize, prioritize, and execute engineering services globally, 24/7. PowerLink provides control, visibility, traceability, and accountability of your outsourcing team, mitigating the risk associated with working offshore.

Reliable, unambiguous communications are a critical aspect of any business that is transacted across remote offices; this is especially true when outsourcing engineering tasks across continents and multiple time zones. Emails and FTPs do not suffice. There is no guarantee that emails have arrived or that FTPs are in sync with the work.

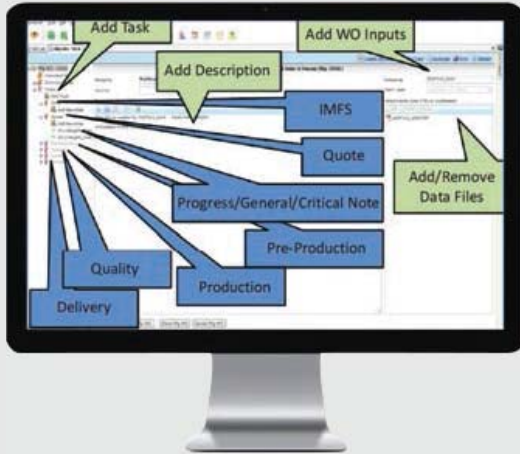

CCE has created PowerLink, a powerful, yet easy-to-use, Work Order Management System to facilitate timely, reliable, and secure communications, with a single set of documents available to all stake holders, worldwide. The Work Order captures all of the input file data, documents, instructions, progress, correspondence, and deliverables, through a single point of entry.

PowerLink allows an authorized user to:

- ▶ Create a Work Order
- ▶ Attach Data Files
- ▶ Write and Receive Notes and Alerts
- ▶ View and Collaborate Engineering Information
- ▶ Receive Deliverables
- ▶ Print Reports

Workflow

- ▶ Add New Task
- ▶ Add Work Order Inputs – added by, required date, output type, volume, ref#, etc.
- ▶ Add Work Order Description/Notes
- ▶ Add/Remove Data Files
- ▶ Work Order Content Search
- ▶ User defined shortcuts for quick work order access
- ▶ Alternate File Upload using FTP Protocol
- ▶ Quote Process
- ▶ Progress/General/Critical Note
- ▶ Pre-production Process (tooling, fixtures and production preparation)
- ▶ Production Process
- ▶ Quality Process
- ▶ Delivery Process

Accountability

- ▶ Multiple Reporting Formats
- ▶ Quality Control Statistics
- ▶ Team Work Load Reports
- ▶ Add/Remove Data Files
- ▶ Work Order Delivery Efficiency
- ▶ Text Report Templates
- ▶ "At-A-Glance" Graphs

Visibility

- ▶ Alerts
- ▶ Critical Notes
- ▶ Progress Notes
- ▶ Delivery Notes
- ▶ In-Process Data File Viewing
- ▶ Work Order View by Task
- ▶ Work Order View by Time-line
- ▶ Dashboard Report
